STEAM EDUCATION

HOME ENTERTAINMENT

OPEN-SOURCE COMPUTER

RiftOne is a computer specially designed for STEAM education system and remote areas, offering an ideal solution for children and those looking for a way to learn programming, create games and content, program robotics, experience IoT and much more.

SMART HOME MODULES

Several RiftOne Smart Home Modules can be connected with each other and can be accessed through one central point— rifOne main device. 360° Security cameras, Projectors, Speakers, Solar Power Bank, Door locks, can be controlled through one home automation system.

RIFTPLAY OTT

rifPlay is an open OTT App and STB, a mix of YouTube and Netflix business model, that allows anyone or any content producer to create a free channel in 5 minutes and start monetizing their content.

NFT MARKETPLACE

RiftOne NFT Marketplace brings artists and creators together on a single platform. Buy premium and exclusive NFTs created by global leading artists. Top Collections.

MVP

Our project is based on an existing working prototype, ready for mass production and the rifOne OTT App

rifOne is an open-source computer that helps children and adults to program and create technological products

RiftOne comes with Linux Ubuntu and rifPlay OS, Quad-core processor, 4G connectivity, Wi-Fi and bluetooth, Gigabit LAN, 4k output, which can handle the most demanding computing tasks.

rifOne gives you access to free-on-air digital television and also access to the Google Play Store, where you can install your favorite games or apps, such as Netflix.

USE CASES

A unique platform that rewards students and it's regular users:

- Students can earn free tokens while using rifOne computer.
- Staking tokens can be used for student future high school fees or university loans.
- Users can subscribe and buy contents on rifPlay with rifOne tokens and get special discounts.
- Access to exclusive prime contents, events and merchandise
- Free access to rifOne software ecosystem: Reunion, a free video conference platform for remote education.

A open OTT platform that uses blockchain to Empower both creators and fans

By registering in our OTT platform content creators will have access to special tools to monetize their contents:

Tokenization of video/audio Contents. People can buy/sell using rifOne tokens.

Content creators can be rewards directly by its fans base with tokens

ability to buy rifOne LIVESTREAM modules that allows creators to go live in no time with several wireless cameras

Content creator will Deal directly with brands to monetize with ads on their channels through Smart contracts
